

SYED HASHIM

SOFTWARE | DEVOPS | AI ENGINEER

PROFILE INFO

Dynamic and technically adept Software & DevOps Engineer with 2.5+ years of experience in building and deploying scalable web, mobile, and cloud-based applications. Skilled in React, Next.js, React Native, Node.js, Python, with strong hands-on expertise in Docker, Git-based CI/CD, and cloud deployments on DigitalOcean. Experienced in integrating software with external systems and services, enabling smooth communication between applications, APIs, and hardware-driven environments.

EXPOSED TO

- CYBER SECURITY
- AI

LANGUAGES

- Urdu
- English
- Hindhi

WORK EXPERIENCE

Research Ass

JAN/2025 - Present

NCAI-NED(ResearchCenter for ArtificialIntelligence,NEDUniversity)

- Leading development of firmware and software systems for AI and IoT-based projects.
- Managing Digital Ocean deployments and CI/CD pipelines for in-house applications.
- Guiding students in Ai & Software Development, systems integration and software optimization.

Software Engineer

JAN/2025 - Present

CROP2X (Private Limited Company)

- Developed and deployed scalable web and mobile apps using React, Next.js, Node.js, and React Native.
- Managed backend APIs, databases, and Dockerized deployments on DigitalOcean.

Software Developer

JUL/2024 - JAN/2025

NCAI-NED(ResearchCenter for ArtificialIntelligence,NEDUniversity)

Conducted research and development in firmware-
software integration for IoT systems.
Supported AI-driven automation projects, contributing
to data acquisition and device control.

Intern

SEP/2023 - JUN/2024

RCAI-NED(ResearchCenter for ArtificialIntelligence,NEDUniversity)

Learned practical skills in coding, problem-solving,
and development workflows during my internship

EDUCATION HISTORY

Bachelor In Business

2023 - present

Allama Iqbal Open University(AIOU)

- [Bachelor of Business Administration](#)

Diploma In Software Engineering

2023 - 2025

Aptech (Pakistan)

- 3 Years Advanced Diploma In Software Engineering

Intermediate

2021-2022

Islamia Science College, Saddar

- Pre-Engineering

Matriculation

2018-2020

White House Grammar School

- Science

Certifications

- Aptech – Global Tech Vision Participant(Aptech)
- Docker Basics Unleashed
- Agentic Ai & Robotics – PIAIC (Panaversity)
- Software Developer Internship – RCAI NED University
- AI/ML Internship – RCAI NED University
- Microsoft Office – Computer Vision Bootcamp

Key Accomplishments

- Leading Software Development for a full-scale Crop Monitoring System designed to serve thousands of users.
- Designed and deployed a real-time cattle monitoring platform using live camera feeds, snapshot APIs, and backend automation for AI-based video analytics and health/activity tracking.
- Developed a Crop Monitoring System leveraging IoT sensors and satellite imagery for precision agriculture, enabling real-time environmental data collection and analytics.
- Engineered and deployed a scalable Hotel Management System with secure authentication, reservation handling, billing management, and role-based dashboards.
- Co-developed an Internship Portal for RCAI Lab, connecting hundreds of students with internship and research opportunities.
- Enhanced Crop2X software at RCAI NED by implementing new modules, data features, and performance improvements.
- Developed automated processing logic that fetches satellite analysis dates, triggers backend tasks, and provides real-time UI states via animated indicators.
- Developed Leadmate, an AI-powered sales assistant that helps sales teams manage and act on leads more efficiently through automated, AI-driven interactions.
- Built a high-reliability Flutter authentication system with sqlite-based local storage, improving app security, reducing login latency, and enabling uninterrupted access without network dependency.
- Planned and structured a Next.js + Express platform for hosting radar datasets and autonomous driving research with premium and free download tiers.
- Led development of KhairAgri, a full-scale Crop Monitoring platform serving thousands of users, featuring GIS field mapping, satellite imagery analysis (NDVI/NDMI via Google Earth Engine), soil/weather sensor integration, AI-driven insights and role-based dashboards across five user roles.
- Built a mobile-first platform promoting environmental sustainability by enabling users to track, manage, and participate in tree plantation campaigns with geolocation and impact analytics.
- Developed an RVM (Reverse Vending Machine) mobile controlling app, enabling users to remotely monitor and control RVM hardware operations from a mobile interface.
- Building AgentOS, a multi-tenant AI Agent Management Platform (Agent-as-a-Service) on a Next.js/FastAPI stack, enabling per-tenant agent configuration with a swappable LLM runtime (Groq/Ollama) and integrated voice pipelines (speech-to-text and text-to-speech), with local voice cloning in progress as an ElevenLabs alternative.

TECHNICAL SKILLS

Programming & Frameworks:

- React, Next.js, React Native, Node.js, Express.js, Python, Flutter.

Databases & Tools:

- MySQL, SQL, MongoDB, Postgres, Git, GitHub, Postman.

DevOps & Deployment:

- Docker, Nginx, CI/CD (Git-based), DigitalOcean Server Management.

AI & Machine Learning:

- Model Training, Agentic Ai, Computer Vision (OpenCV, TensorFlow basics).

Full Stack Development:

- MERN Stack Development, REST APIs, Authentication, Real-time Dashboards.
