PROFESSIONAL SUMMARY

Software and DevOps engineer with 3+ years of experience, including an internship, building and deploying web, mobile, and cloud applications. Skilled in React, Next.js, React Native, Node.js, Python, Docker, and Git-based CI/CD. Experience spans IoT integration, satellite analytics, role-based dashboards, and AI-assisted workflows. Independently built Agri Biss and currently developing AgentOS, a multi-tenant AI agent platform using Next.js and FastAPI.

TECHNICAL SKILLS

Languages & frameworks: JavaScript, Python, React, Next.js, React Native, Node.js, Express.js, FastAPI, Flutter

Databases: MySQL, PostgreSQL, MongoDB, SQLite, SQL

DevOps & tools: Docker, Nginx, Git-based CI/CD, DigitalOcean, Git, GitHub, Postman

Application engineering: MERN stack, REST APIs, authentication, role-based access control, real-time dashboards, IoT integration, GIS mapping

AI: Agentic AI, Groq, Ollama, speech-to-text, text-to-speech, model training, OpenCV, TensorFlow fundamentals

PROFESSIONAL EXPERIENCE

Research Assistant (Software Engineer) | NCAI, NED University

Jan 2025 - Present

- Lead development of firmware and software systems for AI and IoT projects, including systems integration and software optimization.
- Manage DigitalOcean deployments and Git-based CI/CD pipelines for in-house applications.
- Guide students in AI, software development, and systems integration.

Software Engineer | CROP2X Pvt. Ltd.

Jan 2025 - Present

- Develop and deploy web and mobile applications using React, Next.js, Node.js, and React Native.
- Manage backend APIs, databases, and Docker-based deployments on DigitalOcean.

Software Developer | NCAI, NED University

Jul 2024 - Jan 2025

- Conducted research and development in firmware-software integration for IoT systems.
- Supported AI-driven automation projects through data acquisition and device control.

Intern | RCAI, NED University

Sep 2023 - Jun 2024

- Supported development work while building practical skills in coding, problem-solving, and software development workflows.

PERSONAL PROJECT

Agri Biss | Independently Built and Completed

- Independently built and completed a crop monitoring platform from initial development through application integration.
- Implemented GIS field mapping, NDVI/NDMI satellite analysis through Google Earth Engine, soil and weather sensor integration, AI-driven insights, and dashboards across five user roles.

SELECTED ENGINEERING PROJECTS

AgentOS | In Development | Next.js, FastAPI, Groq, Ollama

- Building a multi-tenant AI Agent Management Platform (Agent-as-a-Service) with per-tenant agent configuration and a swappable LLM runtime.
- Integrated speech-to-text and text-to-speech pipelines; local voice cloning remains in development.

Leadmate | AI-Powered Sales Assistant

- Developed an AI-powered sales assistant to help sales teams manage and act on leads through automated, AI-driven interactions.

Hotel Management System

- Engineered and deployed a hotel operations platform with authentication, reservation handling, billing, and role-based dashboards.

Flutter Authentication System | Flutter, SQLite

- Built authentication with SQLite-based local storage to support access without a network connection.

EDUCATION

Bachelor of Business Administration | Allama Iqbal Open University | 2023 - Present

Advanced Diploma in Software Engineering | Aptech, Pakistan | 2023 - 2025

Intermediate, Pre-Engineering | Islamia Science College, Saddar | 2021 - 2022

TRAINING & CERTIFICATIONS

Agentic AI & Robotics - PIAIC / Panaversity; Docker Basics Unleashed; Software Development and AI/ML Internships - RCAI, NED University; Global Tech Vision Participant - Aptech.
